Amendments To The Specification

Please replace paragraph [0034] in the specification page 10, line 17 to page 11, line 11 with the following amended paragraph:

[0034] The second shift register section 240 includes a predetermined number of second switches SW30~SW58 ~~SW31~SW60~~ and a predetermined number of second shift registers SR31~SR60 where SR31 shifts the signal outputted from the SR30. The second switches SW30~SW58 ~~SW31~SW60~~ are switched by the output enable signal OES and then selects either the second vertical starting signal STV2 or an internally shifted signal. Further, when the internally shifted signal is selected by the switching operation of the predetermined number of second switches SW30~SW58 ~~SW31~SW60~~, the second shift registers SR32~SR58 ~~SR31~SR60~~ receive the second vertical starting signal STV2 and then output it after sequentially shifting it. Also, when the second vertical starting signal STV2 is selected by the switching operation of the predetermined number of second switches SW30~SW58 ~~SW31~SW60~~, the second shift registers SR32~SR58 ~~SR31~SR60~~ receive the second vertical starting signal STV2 and then output a predetermined number of second output signals at the same time without shifting.

Please replace paragraph [0035] in the specification page 11, lines 12-23 with the following amended paragraph:

[0035] For instance, the switch SW30 ~~SW31~~ of the second switches

SW30~SW58 ~~SW31~SW60~~ switches to an output terminal of the shift register

SR31 of the second shift registers SR31~SR60 during the active address interval

and switches to an input terminal of the shift register SR30 of the first shift

register section 220 during the vertical blanking interval. Also, the switch SW30

~~SW32~~ of the second switches SW30~SW58 ~~SW31~SW60~~ switches to an output

terminal of the shift register SR32 of the second shift registers SR31~SR60

during the active address interval and switches to an input terminal of the shift

register SR31 ~~SR30~~ of the first shift register section 220 during the vertical

blanking interval.
